DETAILED ACTION

Allowable Subject Matter

Claims 3 and 4 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art does not describe laser burning or laser cutting a mark into the particular claimed adhesive which comprises some colored filler and which is sprayed onto an inactive surface of a die or wafer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. USPN 6,432,796 to Peterson describes "a laser that changes the color of the silicon on the backside of a die." JP409277700A describes (SOLUTION) "the composition for marking is coated by a spray coating method ... and irradiated with laser beam to obtain a white mark." JP402130947A describes "performing marking on a resin seal surface opposite to the ordinary marking surface".
